

# Elevate and Empower your Business

with the Colour Laser Range

# Empower your business, elevate eco-consciousness

Brother's colour laser printer range is designed with both usability and sustainability in mind. Featuring an ergonomic design, easily replaceable components, and rich colour output, ensuring your business enjoys a hassle-free, high-quality printing experience.

## Designed with the environment in mind

As sustainability becomes a business imperative, more companies are adopting eco-conscious hardware. This range is designed to extend product life, reduce downtime with replaceable components and easy to recycle EPS-free packaging. Engineered to reduce our environmental impact, every model in the range contains recycled plastics, consumes up to 31% less energy and produces lower CO2 emissions compared to previous models.

## Engineered for maximum efficiency

**High-speed printing and scanning:** with scan speeds of up to 100 images per minute and 34% faster first print out time than previous models, our latest device delivers best-in-class scanning efficiency to support modern business workflows.

**Effortless setup:** automatically detect and connect to your Wi-Fi network, saving you and your business time by eliminating the need for manual input.

**Built-in Eco Mode feature:** The eco mode feature adjusts fuser temperature and enables power scheduling, conserving energy and helping your business meet its sustainability goals.

**Compact and powerful:** Designed for modern workspaces, this range features a streamlined footprint that fits easily into most spaces without compromising on performance.

# Solutions ready

Enhance efficiency and protect sensitive information with integrated print management solutions. Brother offers a suite of device management, security and workflow solutions which can be added to devices. Helping you streamline operations and safeguard your business.

## Workflow solutions

**Customise your touchscreen:** With Custom UI you can tailor the touchscreen to your needs. Customise layouts, add backgrounds and icons, and create personalised workflows including 'scan-to' destinations.

**Organise documents with barcodes:** Organise documents effortlessly with barcode recognition. Barcodes are analysed and processed on the server, allowing files to be automatically routed and saved to the correct network folder.

**Print barcodes from your device:** With Brother's Barcode Print+ feature, you can easily add barcode printing to your existing Brother office printer, creating high-quality barcodes with ease.

# Secure by design

To keep pace with the ever-evolving legislation on privacy and data security, our devices offer the latest industry-standard security features to securely protect your data.

At Brother we put print security first. All our products are 'secure as standard' using triple-layer security at a network, device and document level, with a range of robust features that means data is only ever seen by those it is meant for.

With businesses shifting towards zero trust environments, we know that security is your highest priority. The range offers enhanced data protection, backed by external security certification for added peace of mind. Every device includes a flexible suite of security features tailored to your business, making it easy to audit, control and manage your fleet.

## Security solutions

### Secure Print+

Print confidential documents securely with Brother's Secure Print+. Your sensitive documents are only printed when you are ready to collect them using a Near-field Communications enabled ID card. Only authorised staff can collect their documents and users are easily added and removed.

### Secure Print Advanced

It's common in an office to pick-up a printed document and find multiple documents left on a printer, increasing the potential of information getting into the wrong hands. The use of pull printing adds an additional level of protection to your documents.

## Device management solutions

**Remote device support:** Brother's business devices have a Remote Panel solution that enables your IT department or service provider to remotely troubleshoot device issues.

**Request help:** Request Help is a Brother service that allows IT administrators or service providers to quickly diagnose printer issues. By pressing the 'Request Help' icon on the control panel, a detailed diagnostic report is automatically generated and emailed to the designated support contact.

**Order supplies:** Ordering replacement toner cartridges for your printer can be done quickly and efficiently using the Brother Order Supplies service. This service ensures that the correct toner cartridges are ordered precisely when needed.

### HL-L8430CDW

# Simplify your printing with Brother's Managed Print Services

Available as part of a Managed Print Service (MPS) contract, each device in this range has been designed with MPS in mind. We recognise what matters to you day-to-day. So, whatever your printing needs, we'll be "at your side" to find the solution that simplifies printer admin, saves time, keeps costs down, and helps you stay productive.

## Benefits of MPS

- Choose the package that suits your business or build a fully bespoke solution
- Automatic toner ordering and delivery before you run out
- Get up and running with a number of installation options, from remote set-up to enhanced onsite demonstrations built around you
- Customisable breakdown support
- Easy toner recycling - we offer a range of recycling services to help you meet your sustainability goals
- We work with you to make sure you are getting the most out of your investment with a service optimised to your needs
- Monitor your print usage, request support and change your service level in the Brother MPS customer portal
- Access to highly trained brother experts at every stage of the process to make sure you are getting the optimal service and support throughout your MPS contract

## Playing our part for sustainability

### Carbon neutral processes

We remanufacture and recycle 100% of ink and toner cartridges that are returned to us, with nothing going to landfill. Returned cartridges are remanufactured to “as good as new” standard and produce around 30% less CO<sub>2</sub> than a new cartridge - giving our customers supplies of the highest quality, with minimum environmental impact.

### Zero waste to landfill

Our UK (BIUK) remanufacturing facility is officially accredited as zero waste to landfill and has been since 2013. Our Slovakia (BISK) remanufacturing facility received the zero avoidable waste to landfill certification in 2024.

Together, these facilities save 1,500 tonnes of material from ending up in landfill every year. These certifications highlight our dedication to sustainable waste management and our ongoing efforts to improve our environmental performance.

### EPS-free recyclable packaging

Our award-winning moulded pulp packaging replaces Expanded Polystyrene (EPS) within our printer packaging. Developed with advanced simulation technology, ensures durability and flexibility for safe product delivery. It uses fewer resources, making it easy to recycle.

Brother stand proudly at Cool Earth's side to help rainforest communities fight deforestation and tackle the climate crisis. Deforestation accelerates climate change, harms biodiversity and threatens the livelihoods of indigenous people. Cool Earth provides unconditional support to rainforest communities, empowering them to protect their land. We back their mission with the same commitment we have to our customers.
